SUMMARY

Full-Stack Software Engineer with 5+ years building high-traffic e-commerce systems and AI-powered enterprise tools. I help companies scale customer experiences and broker workflows through React, Node.js, .NET, and Azure — from Target's same-day delivery infrastructure to Newmark's production AI leasing platform.

WORK EXPERIENCE

Newmark

Dallas, TX

Full-Stack Software Engineer

Oct 2025 – Present

- Architected dynamic interfaces and distributed systems for a leasing application that accelerates broker workflows.
- Engineered and deployed cloud-native microservices using Azure App Services to power enterprise web applications.
- Green-fielded, designed, and shipped to production an AI agency leasing app brokers use to streamline their workflows, freeing up time for revenue-generating workflows (15% of company revenue / ~\$500m).
- Initiate, maintain relationships with, and lead interviews with key stakeholders to increase product adoption and improve development.
- Research product requirements, track and create user stories for all work done.

Target

Minneapolis, MN

Back-End & Front-End Software Engineer

Jun 2020 – Oct 2025

- Owned the \$2.7B same-day delivery flow on Target.com, leading improvements across 6+ micro-frontends to optimize page speed, reliability, and cross-repo deployments, contributing to record holiday conversion rates.
- Integrated real-time backend services (inventory APIs, fulfillment systems) into front-end delivery experiences, maintaining synchronization across top-of-funnel, PDP, cart, account, checkout, etc.
- Collaborated across platform, UX, and fulfillment teams to align system behaviors and customer delivery experiences under peak traffic conditions.
- Completely refactored Target's bottom-of-funnel experience for UX, performance, and code legibility purposes.
- Scoped and redesigned Product Detail Page (PDP) and "Add to Cart" logic, reducing user bounce rate and increasing add-to-cart conversion by streamlining UX and clarifying delivery options.
- Led system design for new checkout pipeline, collaborated with product and backend teams, and supported incident resolution across on-call rotations.
- Scoped, designed, and implemented dynamic phone number add-to-cart feature, which is currently saving \$100k/yr.
- Developed Chef cookbook to create Elasticsearch, Logstash, and Kibana (ELK) instance for SNAP payment logging and deployed it across all payment servers.

PROJECTS

dallasbillboardconnection.com

Stack: React, NextJS, Node, Resend, and Vercel

- Built a lead-generation website for a Dallas billboard company from scratch — interviewed stakeholders, designed the UI, wrote the copy, and shipped it to production.
- Optimized for mobile-first performance and SEO, achieving 100/100 Lighthouse scores across all metrics.
- Integrated Resend API to capture form submissions and route leads directly to the client in real-time.
- Set up CI/CD pipeline with zero-downtime deployments and 99.9% uptime.

SKILLS & TECHNOLOGIES

Languages & Frameworks: JavaScript (ES6+), TypeScript, React, Next.js, Node.js, Express.js, Python, .NET, Angular, Spring Boot, HTML5, CSS

Cloud & Infrastructure: Azure (App Service, Functions), AWS (DynamoDB, Lambda), Docker, Kubernetes, Bitbucket, Git, Jenkins, CI/CD

Databases & APIs: PostgreSQL, MySQL, DynamoDB, REST API, GraphQL, Kafka, Microservices Architecture

Tools & Practices: Agile, BDD, Performance Optimization, Latency Reduction, ELK Stack, Grafana, Jest, Jira

EDUCATION

University of Virginia

Bachelor of Arts in Computer Science (Major GPA: 3.8)

Charlottesville, VA

2021

LEADERSHIP

Management Leadership for Tomorrow (MLT)

Career Preparation Fellow

Washington, DC

Feb 2019 – Mar 2021

- Selected as one of 410 for an 18-month professional development program for high-achieving diverse talent.

Boy Scouts of America

Eagle Scout and Junior Assistant Scoutmaster

New York, NY

Jan 2011 – Mar 2017

- Helped manage a troop of 53 scouts, planned and administered weekly meetings, and led and mentored scouts.
